# THIS IS
COMET
Audit. Investigate. Assure.

It's a proven incident investigation, root cause analysis and prevention methodology

The **COMET** process is unique. It recognises that emphasis on the 'Discover' phase of event investigation generates high quality input data and gives you a solid foundation for making sound decisions for future prevention.

DISCOVER

It's multiple training options

As a COMET user, you will have access to our package of **customisable training options**, designed to provide you with the tools to perform a thorough and robust investigation, establish root causes and identify improvements that prevent repeated failures.

Preventive actions
ACTION

It's a first for human factors analysis

COMET is the first commercially available investigation and root cause analysis methodology to include **human factors (HF) analysis**.

When an element of human error directly contributes to an incident / performance loss, COMET's HF tool helps you to identify the first failure stage, what Performing Influencing Factors (PIFs) contributed

It's a secure web app

COMET Root App brings a digital dimension to your incident investigations and root cause analysis. Using the COMET methodology, the web app allows you to capture, track and measure all aspects of an incident investigation online.

It's subject matter expertise online

Our mobile friendly web app, **COMET Root App Expert Extensions**, assists you with process guidance and subject matter expertise during the key stages of a COMET investigation.
